Hadeeqa Imran

Software Engineer

I am a Full-Stack Software Engineer with over 2 years of experience building web and mobile applications using React Native, Next.js, and the MERN stack. I am skilled in both responsive frontend and backend development, with a focus on creating scalable applications. My expertise also includes AI integration, CI/CD, cloud integrations, and API development. I hold a Bachelor's in Computer Science from FAST University, graduating with a Gold Medal. To stay effective, I continuously update myself with the latest technology trends and am committed to delivering reliable and efficient solutions.

EXPERIENCE

Software Engineer
Dubizzle Labs, **May, 2024 - Present**

- Developed and optimized a cross platform CRM using React Native, ensuring scalability and performance across iOS and Android.
- Collaborated with cross-functional teams to implement new features, improve UI/UX, and enhance app responsiveness.
- Integrated push notifications, deep linking, and third-party APIs to streamline user engagement and app functionality.
- Improved code efficiency and maintainability by refactoring components and adopting best practices in state management.

MERN Stack Developer
Pixelpk Technologies, **February, 2023 - May, 2024**

- Developed scalable web applications using the MERN stack, ensuring seamless frontend-backend integration.
- Developed RESTful APIs, ensuring smooth and efficient data flow with MongoDB.
- Worked closely with stakeholders and cross-functional teams to translate business requirements into technical solutions.
- Refactored existing codebases, improving performance, maintainability, and security across multiple projects.

EDUCATION

NATIONAL UNIVERSITY OF COMPUTER AND EMERGING SCIENCES

BS Computer Sciences **(Gold Medalist)**
Graduated with a 3.96 CGPA

CERTIFICATIONS

- Node Js Advance Concepts - Udemy
- Mastering TypeScript - Udemy
- Next Js: The Complete Developers Guide - Udemy

LANGUAGES

- English
- Hindi / Urdu

SKILLS

- JavaScript, TypeScript
- Next.js, React.js, Tailwind CSS
- Node.js, Express.js
- MySql, MongoDB
- Git, Docker, AWS, Firebase
- CI/CD (Codemagic, GitHub Actions),
- Testing (Jest, Puppeteer)

PROJECTS

Jarvis, React Native
I worked on Jarvis, a suite of four integrated applications, including a CRM and supporting tools, designed to enhance accountability and streamline internal workflows. Jarvis facilitated the entire client journey—from business proposal and onboarding to contract signing and progress tracking.

Fit by Charro - MERN, NextJS
I worked on a web app for a fitness coach to enhance the experience for her subscribers. The app allows users to track their fitness progress, submit updates, and communicate directly with the trainer. This solution has helped improve user engagement and business growth.

Geosync - React, Python, Django
Developed an automated POI validation suite using web crawling, open-source maps, and crowdsourcing for businesses reliant on accurate location data. Built a Siamese GNN for change detection and integrated an OpenAI-powered chatbot for real-time queries.
